**Pax Bag Life Vest**

Pax Bag Life Vest • PNR 7261–27 top view

Pax Bag Life Vest • PNR 7261–27 bottom view

Pax Bag Life Vest • pax mounted

Pax Bag Life Vest is installed under the seat cushion of the pax seat and is attached to the seat structure by four tie raps.

The length and the position of the release strap may be adjusted to the front edge of the seat structure.

Pulling the release strap in horizontal forward or slightly upward or downward direction, the tear seam will break and the life vest is reachable for the passenger.

The bag is made of a soft transparent plastic material, and can be easily inspected and maintained due to a sealable zipper. The release strap is available in yellow or red colour.

- Tested 9g forward
- In accordance with EASA CS 25.853(a) for flammability
- EASA CS 25 “easy reach” criteria fulfilled
- Easy to inspect by flight crew, and ramp inspection
- Supports U.S. TSA bomb search procedures
- 50% and more weight saving compared to traditional hard box
