25 21 00

Seat Blocker

- Easy handling in installation and removal
- Uses existing passenger seat belt
- Light Weight

In accordance with:

- EASA-CS/FAR 25.853 a App. F PT. (a) (1) (ii)

DIMENSIONS

Standard Seat blocker PNR 2521-006

Length:	311,00 mm	12.24 in
Width:	300,00 mm	11.81 in
Height:	186,00 mm	7.32 in
Weight (max):	1,7 kg	3.74 lbs

The seat blocker comprises of a very light, but highly robust design. In between two aluminum sidewalls a canvas material with imprint is installed hiding the passenger belt latch. No extra material for installation on the seat is required, since the seat blocker is using the existing passenger seat belt, and therefore facilitates a quick installation/removal by the cabin crew. With seat blocker installed the passenger seat belt latch is access limited and therewith tamper-proof.

The standard seat blocker is available with grey or yellow canvas material, and the aluminum honeycomb is painted with AIC 2.16 fog (grey).

In regards to the dimensions the seat blocker can also be customized.
